

Truly wireless, cord free earphones with customizable ear fins. Limited edition.

Stylish and fashionable looks

E8 Motion is characterized by beautiful, yet durable materials that let you move in style.

Cord free, truly wireless

E8 Motion are cord-less earphones that let you experience the hassle-free convenience of no wires. The state-of-the-art charging case is fitted with Qi wireless charging enabling you to use the product completely wirelessly.

Customizable ear fins and tips ensure a secure and comfortable fit for physical use

To ensure optimum fit (even during activity), the angle of the driver tube has been carefully designed to ensure optimal friction between the polymer and the ear, and detachable ear fins make sure that E8 Motion sit both comfortably and securely in the ear.

Bang & Olufsen Signature Sound

Tuned by acclaimed Bang & Olufsen sound engineers for an authentic, powerful sound experience, E8 Motion effortlessly power you motion. And with the Bang & Olufsen App you can match the sound profile to your activity.

Premium charging for charging on the go with up to 16 hours of playtime*

E8 Motion is a stylish and truly wireless portable solution. It uniquely features wireless charging (Qi), USB-C and holds three full charges, making it easier than ever to keep E8 Motion playing. It's convenient at home and powerful on-the-move.

* Up to 4 hours of playtime with an additional three charges from the charging case

Microphone

Omnidirectional, MEMS

CONNECTIVITY:

Wireless connectivity

Bluetooth 4.2
Supports AAC codec

Connections

1.25 m USB-A to USB-C cable
for charging

YOU MIGHT WANT TO KNOW:

For greater connectivity and to avoid sound degrading as it passes through human tissue, Beoplay E8 Motion uses NFMI (Near Field Magnetic Induction), an audio streaming technology that transmits sound from one earphone to the other using a magnetic field. This way, the primary earphone can transmit sound to the secondary earphone without loss of quality. NFMI technology is the digital wireless technology currently used in hearing instruments.

Whether you are on a phone call or simply want to listen to music, only the right earphone can be used as a stand-alone device. Only 20 minutes of charging time gives you one hour of playtime.

In the box
