Co Lounge Chair

Our Co Chair series proves that comfort doesn't have to come at the cost of beauty. Equal parts elegance and ease, its graceful minimal, modern frame and supportive, angled backrest make sitting a pleasure—for how ever long it lasts. The new Co Lounge Chair continues the collection's legacy, combining steel, woodworking and upholstering skills and unexpected comfort to create an iconic chair for relaxation that fits seamlessly into any setting

Co Lounge Chair is a new and lightweight lounge with exceptional sitting comfort. Inspired by classic designs that combine metalwork and woodwork to iconic effect, the new iteration purposefully re-spaces its different components to create a lighter, more laid-back look than its dining predecessor. The comfortable design enhances interior spaces rather than demanding attention in a room. The form-pressed wood veneer backrest is angled for comfort and the curved armrests and upholstered seat support and embrace the body. The slender powder-coated steel frame belies its strength, providing a stable and sleek foundation on which to stand. Fully customisable, it melds beautifully with its surroundings—whether at home in a cosy living room corner or placed in a hotel lobby or office reception.

About the Designer

The Co Chair series is created in collaboration with Els van Hoorebeeck and The Office Group, a leading provider of design-led and flexible offices, meeting rooms and co-working spaces for start-ups, small businesses and larger, more established enterprises. Founded in 2003 by Charlie Green and Olly Olsen, The Office Group focuses on creating inspirational workplaces with a genuine sense of community—evident in the inclusion of spaces such as libraries, screening rooms, cafés, gyms and gardens—and which define the ways in which people want to work today, tomorrow and in the future.

Founded in Copenhagen in 2008 by Jonas Bjerre-Poulsen and Kasper Rønn, Norm Architects specialises in residential architecture, commercial interiors, industrial design, photography and art direction. The company name highlights the importance of drawing inspiration from norms and traditions within architecture and design—in particular the Scandinavian design principles of timeless aesthetics and natural materials, and the Modernist values of restraint and refinement. Together with MENU, Norm Architects create design that unites great materials and craftsmanship, while embodying beauty, tradition and timeless simplicity.
