OUTDOOR COLLECTION

# THE HERITAGE

WITH A DEEP-SEATED BELIEF IN  
ENRICHING THE OUTDOOR LIVING EXPERIENCE

The Danish-designed RIB collection has been a long-anticipated project, characterized by meticulous dedication. The collection is designed by Morten Anker and serves as an unreserved homage to the Golden Age of Danish design, particularly honouring the enduring legacies of Wegner, Juhl, Jacobsen, Sibast, and their counterparts who continue to represent Danish design excellence on the global stage. Consequently, the development process naturally extended to accommodate the meticulous crafting of a minimalist, timeless design with an unwavering commitment to quality, comfort, and aesthetics. We are delighted and proud to introduce a sustainable outdoor furniture collection in core teak, which serves as a testament to our Sibast values and promises enduring outdoor enjoyment for years to come.

# THE DESIGNER

A FAMILY HERITAGE THROUGH GENERATIONS

For nearly three decades, spanning multiple generations, the Anker family has been at the helm of designing high-quality, sustainable outdoor furniture. With a deep-seated belief in enriching the outdoor living experience, Morten Anker 2nd generation, has strived to offer the opportunity to savor the pleasures of nature over the years.

The name “Anker,” which carries a familial heritage, has evolved into more than just a surname. Drawing inspiration from ancient symbolism, it encapsulates themes of hope, resilience and serenity. This emblem represents the core values underpinning Anker’s approach to designing and manufacturing outdoor furniture.

Morten Anker’s design vision is centred on contributing to outdoor lifestyles in a sustainable and aesthetically pleasing manner. To achieve this, he dedicates himself to creating beautiful and timeless pieces of the utmost quality, using sustainably sourced materials. The furniture pieces are built to withstand the test of time, a testament to the enduring legacy that the Anker name and family heritage respects.

Morten Anker is committed to preserving the rich Danish design heritage while staying true to his own identity and vision. This commitment to a sustainable approach ensures a shared future where both tradition, aesthetics and innovation coexist harmoniously.

# THE MATERIAL

A SUSTAINABLE APPROACH

The RIB collection is produced from the highest grade sustainable plantation teak wood and with no use of chemistry to stain or treat the wood. This quality of teak wood can last for generations, even without any treatments and as such, is the very best natural material to use. Carefully selected core teak wood is cut, shaped and assembled by hand with the utmost care, before finalising with a special sanding technique for an ultra smooth finish.

For every product sold, one tree is planted through the collaboration with the organization ONE TREE PLANTED.
